Yaounde, 10 NOV 2023

RADIO-PRESS RELEASE

The Minister of Finance informs the general public and the national and international press of the launch of the « **BOOST CAMEROON** » open budget portal at www.boostcameroon.cm. This platform has been designed by the Government of Cameroon with the support of the World Bank. The overall objective is to contribute to transparency and good governance in the management of public finances.

BOOST program launched in 2010 to improve access to budget information and facilitate decision-making on public spending. Already developed in over 45 countries, this analytical tool is designed to facilitate access to disaggregated budget data, in the sense that it presents Settlement Laws according to the nomenclature and budget classifications in force in each country.

For the launch of Boost Cameroon, the information available concerns fiscal years 2019, 2020, 2021 and soon 2022. The development of this important tool will undoubtedly contribute to : (i) reinforce the responsibility of public authorities in the implementation of public policies; (ii) improve citizen participation in the monitoring and control of public policy implementation; (iii) facilitate the understanding of information on programming, budgeting and the monitoring-evaluation of program performance and (iv) improve the consolidation of budgetary and financial information relating to the State Budget by offering a simplified and accessible presentation of budgetary data for the majority of the population./.
